

I have used and depended on XM satellite radio so many times I don't count anymore! The music, news, and the best one traffic & weather. If XM didn't have the traffic stations on there service I wouldn't have made it to many places on time. Most knowing, the birth of my niece, the traffic station said what was jammed and to find another way. Thanks to that service I was on time for her birth. It's as simple as having XM on in the morning finding out the weather forecast along with traffic (faster then the morning news). When driving a long way (out of the FM signal) it's great to have. When in a different city and figuring out your way around the traffic is a godsend! What ever you do not take away this service from XM! Myself and many if not all of the XM listeners use this service and even depend on it.

Thanks, loyal listener
